

Cloud Mountain Vaccination Policy

A covid-19 vaccine requirement is in effect for all retreatants. Attendees on retreats will be required to be fully vaccinated and at least two weeks past the date of their second shot (or first, if receiving the Johnson & Johnson vaccine).

You will be required to provide proof of vaccination. In the two weeks prior to the retreat start you may scan/photograph your vaccination card (front and back) and email or fax it to Cloud Mountain. Please don't submit verification prior to that time. Alternatively, you may present your actual card, or a copy or photo of it, at check-in on the start day.

A medical exception is in place to allow registration for those with a letter from an MD verifying the medical nature of the exemption. This exception request and the accompanying documentation must be provided at the time you submit your registration. People receiving this exemption will be required to mask, social distance, follow high level hand hygiene and comply with all of the other covid-19 health and safety protocols in place for all retreatants at Cloud Mountain. We will also require submission of a negative PCR covid test drawn 3-5 days prior to the retreat prior to or upon your arrival.
