

## **Cloud Mountain Vaccination Policy**

A covid-19 vaccine requirement is in effect for all retreatants. Attendees on retreats will be required to be fully vaccinated and boosted with Omicron-specific boosters for all of those who are eligible for them. (Consult your medical professional with eligibility questions).

You will be required to provide proof of vaccination and boosters. About two weeks prior to the retreat start, we will notify you when we can accept your verification. At that time, you may scan/photograph your vaccination card (front and back) and email or fax it to Cloud Mountain. Please don't submit verification prior to that time. Alternatively, you may present your actual card, or a copy or photo of it, at check-in on the start day.

A medical exception is in place to allow registration for those with a letter from an MD verifying the medical nature of the exemption. This exception request and the accompanying documentation must be provided at the time you submit your registration. People receiving this exemption will be required to mask for the duration of the retreat. We will also require exempt individuals to social distance, follow high level hand hygiene and comply fully with all of the other covid-19 health and safety protocols in place for all retreatants at Cloud Mountain.
